## Standard Expectations

The following activities will no longer appear in the *District Improvement Plan* or the *Campus Improvement Plans*, since they represent practices that are expected to happen in an ongoing manner to provide instructional “standard operating procedures.”

### Curriculum and Instruction

- The District provides a common curriculum for all subjects at every grade level with appropriate learning experiences based on the Texas Essential Knowledge and Skills (TEKS) and ensures that all students, no matter which campus they attend, receive the same curriculum.
- The District curriculum staff updates and revises the curriculum regularly considering teacher input, state and district assessment data, and current research and best practices. The curriculum includes scope and sequence, pacing guides, instructional resources, model lessons, and assessment items that support the content area while addressing the needs of a diverse student population.
- The District curriculum resides in Schoology, the learning management system. Schoology is used to its fullest capacity: lesson planning, resource selection, assessments, data digging, and data interpretations for instructional decisions.
- Teacher teams meet weekly (the appropriate number of times using Schoology) to plan collaboratively and develop effective, relevant lessons that focus on creating classroom experiences that meet students’ needs while maximizing first-time instruction and learning. These classroom experiences provide opportunities in which students
  - use technology (including but is not limited to online textbooks, animations/videos, simulations, reports, assessments, information graphics, probe ware, graphing calculators, programs, etc.) to support the learning of the TEKS;
  - generate and translate between multiple representations (graphs, diagrams, pictures, equations, tables, poems, advertisements, etc.);
  - develop academic language proficiency through speaking, reading, writing, and listening;
  - develop stamina to solve complex problems, read long passages and questions, and transfer knowledge to other situations and/or disciplines; and
  - have time to make sense of their learning (reflective journaling, student discourse, collaborative group work, Socratic seminars, etc.).
- The District provides and campuses follow student placement guidelines and scheduling protocols (Blue Book, Elementary Administrative Handbook, Master’s Scheduler Handbook, etc.) ensuring that students are placed in the appropriate classrooms/programs and are ready and able to achieve at high levels.

### Monitoring

- Campus leaders use various strategies, processes, and/or procedures to monitor the standard expectations to ensure fidelity. Examples include but are not limited to
  - review of lesson plans;
  - participation in team planning by administrators;
  - participation in data review/data dig sessions; and
  - monitor Schoology use.
- Campus leaders gather data, and coach teams and individual teachers in order to improve the impact of first-time instruction and learning.

### Assessment and Data Analysis

- The District develops and campuses administer assessments (District Progress Monitors, benchmark assessments, unit tests, check points, etc.) based on the established assessment calendars.
- Teacher teams review student data from multiple sources (DPMs, benchmark assessments, unit tests, check points, etc.) and develop a response that supports and defines methods for re-teaching and re-evaluating to ensure all students learn the content.
- Each teacher reviews data at the individual student level in an effort to adjust instruction and provide support so that every student has opportunity to master the content.

# Middle School Content Area Standard Expectations

## English Language Arts/Reading (Grade 6-8)

- Use instructional practices and routines to create a classroom community that allows students to actively and safely engage in their learning.
- Utilize reading and writing workshop routines to teach and reinforce critical TEKS [think aloud, modeling reading and writing processes in mini-lessons, interactive read aloud with accountable talk, independent reading and writing, grammar instruction that focuses on meaning and effect (Patterns of Power), small group instruction, and conferring].
- Model reading and writing strategies including think alouds and demonstrations for students routinely.
- Design learning experiences that foster academic talk and partnerships including informal discussions, book talks, peer conferences, shared writing, and structured turn and talks regularly.
- Ensure that students have choice in their independent reading across genre and reading levels.
- Use formal and informal data to drive instructional decisions to create daily lesson plans, form small groups, and plan for CTG/AI instruction.
- Provide opportunities for students to use technology, engage with digital texts and resources, to create, collaborate, and think.

## Mathematics

- Include teaching strategies and questions designed to promote higher-level thinking in lesson plans to improve first-time learning.
- Incorporate the use of small-group instruction to meet the needs of individual learners.
- Encourage student discourse/discussion including justifications, similarities, and differences.
- Provide time for student to explain, justify, and defend their ideas.
- Use multiple representations (models, pictures, words, tables, graphs, equations, etc.) to make connections.
- Encourage students to use precise mathematical vocabulary.
- Use the graphing calculator and other technology to discover relationships and compare multiple representations.
- Incorporate the use of technology for student learning every day.
- 1:1 Technology in the math classroom should provide opportunities for students to:
  - Use the rule of thumb of a weekly average use of the following:
    - 55% paper resource, 35% digital resource, 10% flex
  - Use Chromebook devices to engage in digital creation and collaboration
  - Use technology to discover relationships and/or make connections between representations of mathematics, beyond skills practice
  - Incorporate the use of digital tools such as Desmos, Geogebra, ClassFlow, Interactive Textbook, Schoology, Google Suite, etc.
  - Incorporate the use of technology inside the math classroom when it is the most effective tool for the task being asked of the student
  - Communicate and share products using digital tools such as Google Suites, WeVideo, FlipGrid, etc.

## Secondary Science

Collaboratively plan science instruction in which all pieces are aligned to each other as well as to the standards (TEKS, district curriculum documents) and that incorporate research-based practices that maximize first-time instruction.

- structure learning opportunities to build upon prior knowledge, work from simple to complex concepts, and move from concrete to more abstract models;
- encourage students to connect large scale views (macroscopic) to small scale views (microscopic) of concepts using models and representations;
- provide opportunities to create and refine physical and mental models as new understandings are acquired while identifying the strengths and limitations of developed models;
- allow students the opportunity to make connections between concepts in different units, courses, disciplines, and daily life;
- seek current level of student understanding and provide appropriate next steps for learning;
- clearly define and communicate learning outcomes to students;
- incorporate the use of technology inside and outside the classroom when it is the most effective tool for the task being asked of students;
- allow students to uncover trends and concepts by performing investigations, collecting and analyzing data, and communicating results—a minimum of 40% of instructional time; and
- provide opportunities to independently or collaboratively develop and communicate ideas.

1:1 Technology in the science classroom should provide opportunities for students to:

- use Chromebook devices to engage in face-to-face and digital collaboration;
- locate and access information and resources stored in different platforms;
- explore simulations;
- collect and represent data using probeware and other digital tools;
- analyze and interpret data using various digital tools;
- communicate and share conclusions.

### **Social Studies**

- Include questions designed to promote higher level thinking in discussions, daily activities and assessments.
- Provide daily opportunities for student processing of information.
- Use a variety of facilitation modes to meet students' diverse needs
- Use collaborative activities to process information and/or demonstrate content mastery.
- Ensure that students use problem-solving and decision-making skills in a variety of settings.
- Provide opportunities for student discourse and discussion.
- Incorporate the use of small group instruction to meet the needs of individual learners.
- 1:1 Technology in the social studies classroom should provide opportunities for students to:
  - engage in collaborative problem-solving activities and discussions
  - use research tools such as primary and secondary sources for in depth study and relevant applications
  - analyze visuals (cartoons, maps, images) using critical thinking skills
  - access differentiated content for readiness and skill level and/or interests
  - utilize devices for self-directed learning
  - demonstrate mastery by using various digital tools and creating a variety of products

### **LOTE**

- Speak the target language more than English in all levels.
- Limit English translation - use visual clues, anchor charts, modeling, or desk guides to enhance student learning.
- Use activities that move students beyond "word-level" performance. All students working towards building sentences (Lvl 1), strings of sentences (Lvl 2), and paragraph-length narration (Lvl 3+).
- Discover grammar in context instead of using isolated mechanical or rote drill.
- Use authentic real-world tasks that integrate listening, speaking, reading, and writing.
- Provide ongoing feedback as students work independently, in pairs, and in small groups.
- Use the TEKS proficiency targets to ensure instruction and assessment are at the appropriate performance expectations.
