

Purpose of the Hotspot Program

The CFISD LTE 1:1 Hotspot program provides a hotspot to any student who does not have access to Internet at home. Students will be able to access many resources for instructional purposes. Only CFISD-issued Chromebooks will be able to connect to the Hotspot. When using the Internet on district-provided Chromebooks, websites will be analyzed using the district's network content filtering system. Parents may request a hotspot for their child on the district's website.
